## WORK EXPERIENCE

### Full-Stack Developer & SaaS Founder

Self-Employed | 2024 – Present

- Built and launched a Full-Stack Inventory Management SaaS, currently in beta testing with local businesses.
- Developed custom automation solutions, reducing manual workload and improving operational efficiency for SMEs.

### Freelance web developer

Freelance Projects | 2023 – Present

- Liyu Umbrella Startup Website – Developed a modern, responsive site for a fast-growing startup, increasing brand awareness and user engagement.
- Smart Light System Website – Designed a sleek, interactive web platform for a smart lighting project, integrating Spline 3D visuals for a unique experience.
- Local Freelance Marketplace Landing Page – Built a high-converting landing page for a local freelancer marketplace, improving client sign-ups and interactions.
